Catapult

Catapult's Grants Management Solution

Streamlining Grants. Empowering Your Mission.

Catapult's Grants Management solution streamlines and enhances the grant making process, from creation to completion. Through greater efficiencies, we allow grantmakers to focus on fulfilling their organization's mission without the complexity of managing the grant process.

Grants Program Manager Dashboard

Today, institutions choose between grants management packages from one of many off-the-shelf providers, or custom develop an application for their unique needs. Off-the-shelf solutions can be too complex, having far more features than needed. They can also lack the flexibility necessary to adapt to organization's unique needs and processes. Custom applications can be expensive and require long development cycles.
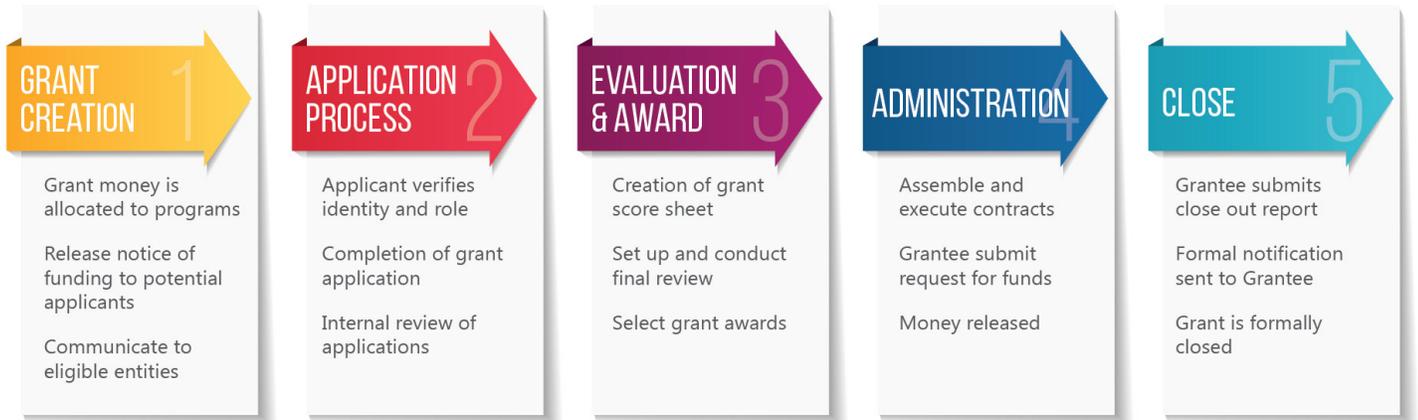

The Catapult Difference

The Catapult's Grants Management solution blends the best of both worlds. We marry the best practice business processes found in an online solution with an expert-led exploration of your grantmaking program's unique needs to create a solution that is custom configured for you, and that is ready to deploy quickly.

With our custom-configured Grants Management solution, you can greatly reduce the administrative burden associated with creating, reviewing, verifying, scoring and awarding grants to individuals, businesses or governments. During the lifetime of the grant, this

solution continues the post-award administration including contracting, funding and reimbursement, as well as reporting and ongoing progress monitoring.

Systems Tasks in the Grantmaking Cycle

GRANT CREATION 1	APPLICATION PROCESS 2	EVALUATION & AWARD 3	ADMINISTRATION 4	CLOSE 5
Grant money is allocated to programs	Applicant verifies identity and role	Creation of grant score sheet	Assemble and execute contracts	Grantee submits close out report
Release notice of funding to potential applicants	Completion of grant application	Set up and conduct final review	Grantee submit request for funds	Formal notification sent to Grantee
Communicate to eligible entities	Internal review of applications	Select grant awards	Money released	Grant is formally closed

Built on a Dynamic Platform

The solution layers best practice business processes in grants management onto Microsoft Dynamics CRM to provide next-generation productivity improvements for customers. The CRM platform easily integrates with Microsoft solutions, such as Office365, to support Excel and Word templates and editing within the solution; document management across SharePoint and OneDrive; and robust email and task creation with Exchange. It is a highly scalable architecture that provides unlimited opportunities for future development and enhancement beyond the core grants management functionality.
